## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of hydroxyl zinc stannate (ZHS) and magnesium hydroxide in the reply filed on 8/29/08 is acknowledged. Applicants identify claims 1, 2, 4, 6, and 7 as reading on the elected species. This is indefinite given the scope of claim 4. Claim 4 identifies the anti-smoke agent as being the molybdenum compound. This is mutually exclusive of the ZHS elected specie. As such, claim 4 is withdrawn.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,6, and 7 are rejected under 35 U.S.C. 102(b) as being Clearly anticipated by Cusack et al. US 6,150,447.

4. Example 14 is seen to anticipated the claimed composition. It incorporates the ZHS + MgOH composition of example 9 into the claimed vinyl chloride polymer.

### ***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1,2,6 and 7 rejected under 35 U.S.C. 103(a) as being unpatentable over Cusack et al. as applied to the claims above, and further in view of Harvey et al. US 5,744,525

7. Cusack et al. fails to specifically identify the incorporation of an acrylate processing aid. The acrylate processing aids are well known and conventionally incorporated into PVC compositions. The Harvey et al. Patent is cited as showing this conventionality. As such, one would be motivated to incorporate the processing aid of Harvey into the compositions of Cusack given the known function of the processing aid and expectation of desired results. As such the claim limitations are rendered prima facie obvious.

### ***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
